WRITTEN OPINION

International application No.

PCT/IB02/02992

V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. statement

Novelty (N)	Claims	<u>2-16,18-31,38-41</u>	YES
	Claims	<u>1,17,32-37</u>	NO
Inventive Step (IS)	Claims	<u>NONE</u>	YES
	Claims	<u>1-41</u>	NO
Industrial Applicability (IA)	Claims	<u>1-41</u>	YES
	Claims	<u>NONE</u>	NO

2. citations and explanations

1. Claims 1, 17 and 32-37 lack novelty under PCT Article 33(2) as being anticipated by Renaud et al, U.S. pat. no. 5,958,051.

Renaud discloses a system for enabling secured communications between a browser terminal and a network comprising:

- a) initiating a terminal session with the browser,
- b) providing information including certificate and rating from the network to the browser (see col 6, lines 53-64),
- c) verifying and displaying security level of the certificate based upon communication standard prior to conducting data session (see col 11, lines 46-65 and col 13, lines 54-67).

2. Claims 2-16, 18-31 and 38-41 lack an inventive step under PCT Article 33(3) as being obvious over Renaud in view of Sullivan, U.S. pat. no. 5,953,528.

Renaud's teachings are still applied. Renaud does not teach using visible indicators for specifying different levels of trust associated with a particular object. Such teachings are disclosed by Sullivan (see Sullivan's col 6, lines 2-6).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Renaud with Sullivan's teachings because it would have allowed users to more easily recognize different levels of trust associated with the network and data files.
